Turmeric

Dual Chamber Capsules

PRODUCT DESCRIPTION

dōTERRA is the first to combine CPTG Certified Pure Tested Grade® Turmeric essential oil and Turmeric extract in a dual chamber capsule, creating a uniquely powerful synergy of tumerones and curcuminoids, in order to maximize the effectiveness and benefits of both compounds for a healthy inflammatory response.†

Derived from a plant that is a member of the ginger family and a key botanical of the traditional Ayurvedic health practices of India, Turmeric essential oil and extract have a long history that has inspired many modern uses of Turmeric today.

Turmeric Essential Oil

Steam distilled from turmeric roots of the *Curcuma longa* plant, Turmeric essential oil encourages the body's healthy response to inflammation and oxidative stress, and may support healthy cellular function.† Turmeric essential oil has two unique chemical components, Turmerone and ar-Turmerone, that have been shown to help the body with the absorption of curcumin, offering support to the body's natural defenses.† These components make Turmeric essential oil a daily staple.

Turmeric Extract

Turmeric extract may be one of the most effective nutritional supplement in existence because it contains curcuminoids that help the body fight free radicals and have a role in protecting against oxidative damage.† An important benefit of Turmeric extract is its ability to maintain a healthy inflammatory response at the molecular level.†

Dual Chamber Capsules

Research has shown that curcuminoids have poor bioavailability, but when combined with turmerones from Turmeric essential oil bioavailability can be increased. The dual chamber capsules are truly unique because they combine key ingredients together in one convenient delivery system, resulting in better absorption of Turmeric. Unlike other brands that combine Turmeric extract with agents like black pepper extract, the dual chamber capsule is a more natural approach.
