

Copaiba

SOURCED FROM:

FUN FACT

dōTERRA works with harvesters, many of whom live along the Amazon River, who use a tree-tapping method—similar to how maple syrup is harvested—to collect the copaiba resin.

WHAT IT TAKES TO MAKE A BOTTLE:

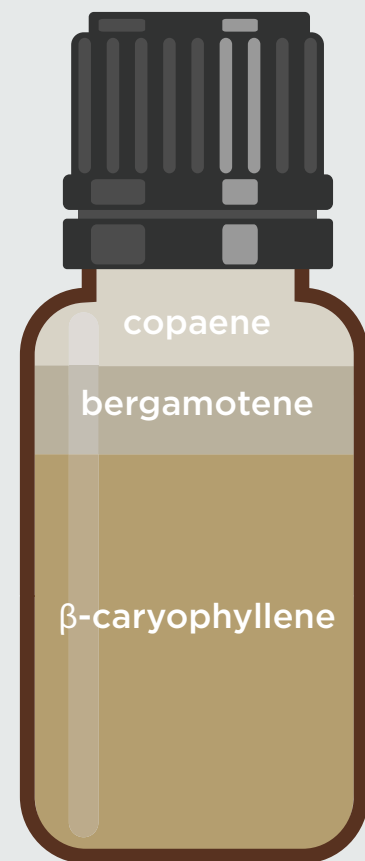

~ 30 GRAMS*

It takes ~30 grams of copaiba resin to produce 15 mL of Copaiba essential oil.*

CHEMISTRY:

Graph represents chemical compounds most prevalent in this essential oil. Additional constituents may be found.

FUN FACT

The copaiba tree can live up to 400 years and grow more than 30 metres tall.

Blends well in the diffuser with:
