

PRIMARY BENEFITS

- Small, motion-activated diffuser operates without water.
- Designed to hibernate until it detects the presence of movement.
- Infrared motion sensor that reaches up to 4 metres with a 120-degree field of view.
- Two modes: normal or high, to personalise the perfect ambience of any room.
- Complete with a USB cable charger, ideal to charge via multiple USB ports.

PRODUCT DESCRIPTION

With its compact size and practical portability, the dōTERRA Bubble fits in almost any space to create the perfect environment, anywhere, anytime. This small, motion-activated diffuser is made to hibernate until it detects the presence of movement. With an infrared motion sensor that reaches up to 4 metres, the Bubble has a 120-degree field of view and stands inconspicuously, ready to release your favourite oil or blend whenever someone enters the room.

Simple to set up, this powerful diffuser operates without water and in two mist modes, normal and high, so you can create the perfect ambience. Suitable for 5 ml and 15 ml dōTERRA essential oil bottles, this economical diffuser can fill a 10 metre-squared room and runs for up to 12 hours. When the indicator light flashes, use the USB cable to recharge the diffuser until it's ready to use.

Dimensions: 4.6 x 4.6 x 7.55 cm.

CAUTIONS

See diffuser manual for cautions and instructions.
