

SOURCED FROM:

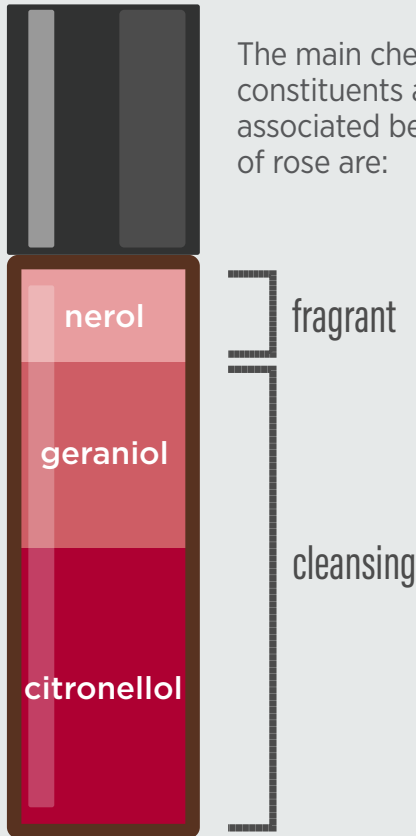

WHAT IT TAKES TO MAKE A BOTTLE:

It takes approximately 1,400 roses to produce one bottle of Rose Touch.

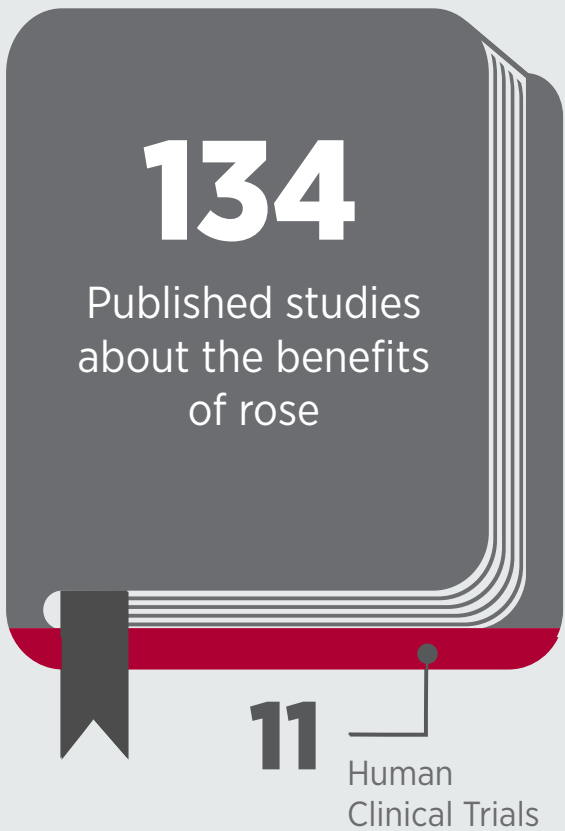

CHEMISTRY:

The main chemical constituents and associated benefits of rose are:

Graph represents chemical compounds most prevalent in this essential oil. Additional constituents may be found.

RESEARCH:

Numbers according to PubMed as of December 2017

FUN FACT

Because rose petals are so delicate, distillation must happen the same day that the flower is harvested.

WORKS WELL WITH:
