

PB Assist® +

Probiotic Defense Formula

Supports healthy digestive functions and immunities

PRODUCT DESCRIPTION

PB Assist+ is a proprietary formula of pre-biotic fiber and six strains of probiotic microorganisms in a unique double-layer vegetable capsule. It delivers 6 billion CFUs of active probiotic cultures and soluble pre-biotic FOS (fructo-oligosaccharides). PB Assist+ offers a unique, safe, and effective way to deliver the benefits of probiotics.

DIRECTIONS FOR USE

Take one double-layer capsule three times daily with food for 10 days each month. Can be used more frequently and for extended periods of time. PB Assist®+ also may be used when traveling, or once a day as an ongoing maintenance program.

CAUTIONS

Some people may experience an initial change to digestive schedule and function when they begin using pre-biotic FOS and probiotics. For most people, these symptoms are mild and should disappear after a few days. Pregnant or nursing women and people with known medical conditions should consult a physician before using. Do not use if bottle is opened or capsules are broken.

Note: Although the PB Assist+ double-layer encapsulation technology makes it unnecessary to refrigerate, it is suggested that unopened bottles of PB Assist+ be stored in a cool, dry place and opened bottles be refrigerated when possible.

COMPLEMENTARY PRODUCTS

- dōTERRA Lifelong Vitality Pack®
- DigestZen TerraZyme®
- GX Assist®

FAQS

Q: Why do I need six strains and 6 billion CFUs of probiotics?

A: Having six unique strains helps promote healthy colonization and function of microflora. They support healthy digestive and immune functions throughout the intestines. Each of these unique strains has been demonstrated to have superior propensity for intestinal adhesion and colonization. Six billion CFUs provide a

beneficial amount of good bacteria in each capsule.

FAQS (continued)

Q: What is the difference between probiotics and prebiotics?

A: Prebiotics are indigestible fibers that are found in fruits and vegetables and have the ability to selectively promote the growth of friendly bacteria while discouraging the growth of less friendly intestinal microbes. Probiotics are microorganisms that support healthy colonies of friendly microflora in the gut.

Q: Why do probiotics and prebiotics need to be separated by an inner and outer capsule?

A: This unique delivery system is designed to help ensure the live active cultures will be released in the small intestine. The outer capsule must be dissolved, the FOS prebiotic fiber suspended in a thick viscous fluid must be dissolved away in the digestive fluid, and then the inner capsule must dissolve.

Q: Does the green inner capsule have any synthetic colorants?

A: The green color in the PB Assist+ inner capsule comes from chlorophyll, the all-natural green pigment found in all plants.

Q: Should I take PB Assist+ at the same time that I take GX Assist®?

A: We recommend using GX Assist for ten days (three capsules per day with meals) followed by PB Assist+ for ten days (three capsules), then PB Assist+ (one capsule per day) after that.

Q: Do I need to keep PB Assist+ refrigerated?

A: Although it is best to keep PB Assist+ out of the heat, it is not necessary to refrigerate. PB Assist+ is tested for shelf life and stability and will retain its activity level when stored under normal conditions. Dry probiotic cultures such as the ones used in our PB Assist+ capsules are not activated until they are released in the gut and exposed to moisture.
