My daily nutritious breakfast include blueberry powder because it helps to improve my antioxidant capacity and relieve eye muscle fatigue. It is suitable for those of us who face life and work stress, environmental pollution, frequently look at the phone and computer screen and so on. With the new TerraStix AO which include blueberry powder, it brings convenience as I don't need to buy blueberry powder separately anymore.

I love to drink TerraStix DX together with TerraMix FB at night as I really like its sour-sweet flavor combination. For me, both TerraStix DX and TerraMix FB are vital in our lives because the broccoli seed extract and moyeam leaf extract can help to improve our health by boosting liver detoxification function.

TerraStix AO has a nice orange-mango flavor, it is in yellow powder form, one of the main ingredients is turmeric which has a strong antioxidant and anti-free radical properties. Be careful when you take TerraStix AO as it might stain your white color shirt due to the turmeric ingredient. It also has blueberry powder and pomegranate extract whereby both have well-known antioxidant properties as well. That is why it is really good for achieving anti-aging result. After taking TerraStix AO and TerraStix DX for two weeks, I found that my bowel movement is very smooth and my digestive process become very comfortable. I love TerraStix products because it is very convenient, just take TerraStix AO in the morning and TerraStix DX at night. The taste is delicious and I love it!

We often neglect our health when we are living a busy life that involves work stress, we eat irregularly, and often stay up late, and so on. Our body will accumulate large number of toxins because of this. I'm feeling grateful as dōTERRA recently launched the TerraStix AO and TerraStix DX. Ever since I started taking these two products, it helps with improving my sleep quality. Since TerraStix AO can improve the antioxidant capacity of our body, my skin has become more radiant. Do you want to experience it yourself? Don't miss this opportunity!

I would like to share my experience of taking dōTERRA's new products of TerraStix AO and TerraStix DX. Both of these products are great for liver detoxification and to enhance the digestive tract antioxidants through broccoli seed extract and moyeam leaf extract, also known as vine tea leaf. I take these two products to provide a good care to my liver as much as I could. Both taste very nice, not bitter at all and not sweet neither. Both are packed into small sachet, easy to carry and convenient to take wherever I go. I take one sachet of TerraStix AO every morning before leaving for work and one sachet of TerraStix DX before I go to bed.

Besides having curcumin, TerraStix AO also contains pomegranate extract, blueberry powder, grape seed extract, and my favorite Lemon essential oil. The curcumin that is contain in this drink mix is beneficial to the chronic inflammation of the human body. Also, the active ingredients in the pomegranate extract have significant anti-oxidation and anti-aging effects. Every morning, I often prepare TerraStix AO with cold water and drink it like a fruit juice. The taste is incredible! Besides broccoli seed extract, TerraStix DX contains another natural extract called moyeam leaf extract, and also Lemon essential oil that is super fragrant. Moyeam leaf is a traditional herb use to improve liver detoxification function and liver health. Thank you to the Company for giving me the opportunity to try this product in advance. Those around me know what kind of transformation I'm having right now. I'm a little smaller in size, and a little lighter as well.

I experience blurred vision and eye fatigue recently whenever I'm looking at the computer or looking afar. Ever since I started taking TerraStix AO, this condition has improved tremendously. Not only can I see clearer looking at the computer or looking afar, my eyes are not easily fatigue too. When I learnt about the anthocyanin compound that is available in the TerraStix AO, I tried this product for seven to 10 days, and my condition has improved a lot. I didn't realize I experience anything unusual when I consume TerraStix DX until I felt itchiness on my skin one night that went on for two to three days. It doesn't feel right. Ever since I learnt about the moyeam leaf extract ingredient in the TerraStix DX, I realized that it can help boost our liver detoxification process. I experience itchiness during the consumption of TerraStix DX. I feel relieved after knowing that itchiness is common during the recovery process which can last for a few weeks. I'm even more grateful when the itchiness was gone after seven days. From that day onwards, I felt very energetic and spirited waking up in the morning.

Last year, I gave my three children the chance to try TerraStix AO and TerraStix DX because they dislike consuming tablet-like supplements. My second child is fine with it, but my youngest child is not used to it. So, I decided to buy this doTERRA's TerraStix AO and TerraStix DX from abroad. Since I did some research on the ingredients, I know that it is a health product with purification, detoxification, and antioxidation benefits.

In the early stage, my elder daughter is busy chasing quota that caused her to have irregular work and rest times, which resulted in experiencing constipation. Even though constipation is not a disease, it is the root of all diseases as many diseases begin from having constipation. As a Wellness Advocate, she knows what is the root of the problem, hence she begin her detoxification process. In just two weeks, her constipation condition improved. For my second daughter, she has oily skin and is prone to acne formation. I asked her how she felt after consuming TerraStix AO and TerraStix DX. She said her acne condition has improved a lot.

I didn't start consuming it until recently. Since I have always consume LLV, so I let my children to try TerraStix AO and TerraStix DX. I have been in the service industry for many years, and I dislike having a type of smell in my mouth. In fact, I dislike the yellowish stain left behind after my children consume TerraStix AO, I may also felt terrified by the large amount of turmeric juice I need to consume everyday during my confinement. After knowing that the Company will make TerraStix AO a permanent product in Malaysia, I decided to try it myself. Since then, I've fall in love with it as it taste really good.

TerraStix AO is a type of drink mix that can improve antioxidant capacity of our body. It can not only purify the body, but also promote digestion. It is a delicious daily supplemental drink. It has turmeric extract, grape seed extract, Lemon essential oil and other ingredients, as well as orange and mango flavor. Whenever you feel tired, this drink can help to awaken your tired body.

TerraStix DX can help boost liver detoxification function. It contains broccoli seed extract and moyeam leaf extract, it has a berry-lemon flavor which is good for improving quality of sleep. You start the day by consuming a sachet of TerraStix AO, and end the day with a sachet of TerraStix DX at night to obtain a relaxing mind and body as you go to bed.

I'm unable to obtain sufficient vitamins and nutrients due to my busy schedule, staying up late, irregular meals, and of not consuming enough vegetables in my diet.

Ever since I started taking TerraStix AO and TerraStix DX, I felt really good about it. TerraStix DX is a drink mix that contain natural extracts. It is especially good for my liver detoxification function. It helps to remove toxins from our body. This small sachet is convenient to bring along and consume. Also, it is made from many wholesome ingredients.
