

1. Is IKISE® suitable for sensitive skin?

Yes, IKISE® is formulated with gentle, plant-based ingredients and CPTG® essential oils. However, as with any new skincare, we recommend a patch test before full application.

2. Can I use IKISE® products both morning & night?

Absolutely. The core 4-step ritual (Cleanse – Face Wash, Moisturize – Lotion, Hydrate – Dual Serum, Nourish – Day & Night Face Cream) is designed for daily use, morning and evening. Some users adjust depending on skin needs or lifestyle.

3. What skin types is IKISE® best for?

IKISE® was formulated for all skin types, with layering guidance for dry, normal, and combination skin. It's flexible and customisable with add-ons like Booster Oil for more targeted support.

4. What's the shelf life of IKISE® products?

Please refer to the expiry date of the product. Once opened, we recommend using within 6–12 months for optimal freshness and efficacy.

5. Can I layer other products with IKISE® (e.g. sunscreen or makeup)?

Yes! IKISE® is designed to work beautifully under sunscreen and makeup. Just ensure your Day & Night Face Cream has fully absorbed before applying other products.

6. Why are CPTG® essential oils used in skincare?

CPTG® essential oils offer both aromatic and topical benefits — contributing to a refreshing, calming sensory experience while helping support the appearance of clear, healthy-looking skin. In IKISE®, they are used with care to enhance both the ritual experience and visible skin results.

7. Is the fragrance in IKISE® natural?

Yes. All scents come from the natural CPTG® essential oils used in the formulation — no synthetic fragrances are added.

8. Can I use the Dual Serum with other serums I already own?

We recommend using IKISE® as a complete system for best results, as the ingredients are designed to work in harmony. If adding other serums, use caution and avoid doubling up on actives like Vitamin C or acids.

9. How much product should I use per step?

Face Wash: Small pearl-sized amount

Booster Oil: Apply 1–2 drops after cleansing, before the Lotion or Dual Serum.

Lotion: A few drops in the palm, pat onto skin

Dual Serum: 1–2 pumps (shake gently until both layers are mixed)

Day & Night Face Cream: A small scoop, warm in hands and apply onto face

10. Can men use IKISE®?

Absolutely. IKISE® is unisex and suitable for all skin. In fact, men especially love the clean feel, natural scent, and visible results without heavy texture.

11. Is IKISE® safe during pregnancy or breastfeeding?

The range uses gentle, natural ingredients and essential oils at safe topical levels, but we recommend speaking with your healthcare provider for personal guidance.

12. Do I need all the products to see results?

While the full ritual offers the most benefit, even starting with the Face Wash + Day & Night Face Cream or adding the Dual Serum to your existing routine can deliver visible results. You can build your ritual step by step.
