

## Lavender Peace<sup>®</sup>

*Restful Blend 15mL*

---

### What has changed about dōTERRA Lavender Peace<sup>®</sup>?

dōTERRA Lavender Peace<sup>®</sup> Restful Blend is now formulated with dōTERRA Madagascar Vanilla. dōTERRA Madagascar Vanilla is a Vanilla Absolute known as an SFE, meaning it is extracted using a super fluid extraction method. The difference between Vanilla Absolute and Vanilla Supercritical Fluid Extract (SFE) Absolute is the use of supercritical Co2 during the extraction of the plant material. Because of the clean Co2 extraction method, heavier compounds can be pulled from the plant without modifying their chemical structure. Those heavier compounds add deeper, more complex aromas that are more authentic to the original plant material, making them superb options in blends that are worn as a fragrance or diffused.

As with all essential oils and raw material extracts used, this new Co2 extract is thoroughly tested with the strict CPTG process to ensure the purity, usage, and safety of dōTERRA essential oils.

### What else is different about dōTERRA Lavender Peace<sup>®</sup>?

In addition to the new Vanilla SFE, and to protect the aroma profile of dōTERRA Lavender Peace<sup>®</sup>, we've changed a few other oils in the blend, removing Ho Wood and Hawaiian Sandalwood, and adding Sandalwood and Tonka Bean.
