

dōTERRA ADAPTIV® CALMING BLEND CAPSULES

We live in a world where we want everything to happen instantly. We spend too much time with our smart phones and laptops without ever really giving ourselves a break from work. We lose out on opportunities to connect with friends and family. We feel that working hard and taking fewer breaks makes us successful. The bills won't stop coming, there will never be more hours in the day, and work and family responsibilities will always be demanding. A nagging headache, trouble sleeping, a lack of energy and decreased productivity are all signs of everyday stress. Exercise like Yoga or a few hours at the gym helps. Meditation, eating right, even hobbies or a vacation can be beneficial. Stress management is all about taking charge of lifestyle, thoughts, emotions, and dealing with problems. Let's face it, we can't completely eliminate stressors so we need something to help us adapt. The dōTERRA Adaptiv Calming Blend products are an effective way to enhance mood and help adapt to new surroundings.

PRODUCT DESCRIPTION

dōTERRA Adaptiv Calming Blend Capsules combine the soothing benefits of specifically selected CPTG® essential oils with clinically studied botanicals. A supportive and relaxing formula, this proprietary blend of ingredients helps empower and encourage when adapting to stressful situations or acclimating to new surroundings. The dōTERRA Adaptiv Calming Blend Capsules are one of the best tools available to help manage the effects of everyday tension, anxious feelings, uneasiness, and worry.

CONCEPT

The dōTERRA Adaptiv Calming Blend Capsules have mood-boosting and tension-reducing effects of a blend of CPTG® essential oils Lavender, Wild Orange, and Fennel along with Scelletium, GABA, and Ahiflower®.

Botanical extract Scelletium comes from a succulent plant found in South Africa known as Kanna. Scelletium Extract is responsibly sourced from a sustainable supply with endorsement by the South African indigenous knowledge holders. A unique phytochemical ingredient found in Scelletium Extract, brings a feeling of "alert serenity." The extract supports healthy emotional responses to everyday stressors and promotes feelings of well-being. It balances healthy levels of mood-stabilizing hormones and improves cognitive function.

A quieting neurotransmitter, GABA, also helps promote relaxation. GABA has a natural comforting effect and helps reduce feelings of apprehension and fear by decreasing neuronal excitability. Sometimes called "the brakes of the brain," because it lowers the activity of neural cells in the brain and central nervous system, it has the effect of moving the brain and the body into lower gear. By inhibiting neural activity, GABA reduces mental and physical strain.

Ahiflower is naturally wild and cultivated for its precious seeds, each bloom produces only up to four seeds. These seeds are pressed to produce a superior omega-rich, healthy oil with a higher quality and quantity of omegas than any other seed oil. Clinical data on omega oils have demonstrated a positive effect on mood.

Use the dōTERRA Adaptiv Calming Blend Capsules to assist the body and mind to stay balanced and adapt to every situation. Try the 15mL dōTERRA Adaptiv Calming Blend and 10mL dōTERRA Adaptiv Touch for even more support.

DIRECTIONS FOR USE

Take one Adaptiv Calming Blend Capsule daily to combat tension and occasional anxious feelings.
