

# Slim & Sassy Contrōl™

## PRODUCT DESCRIPTION

Overeating is one of the worst culprits in the fight for weight management. There are many reasons we overeat as well as different ways we overeat. Sometimes we emotionally eat and snack too much, or we eat larger portions than we should, or we just eat too much of the wrong kinds of foods and not enough fruits and vegetables. It all comes down to being able to control our appetite and eat what we should, when we should, and as much as we should.

Slim & Sassy® presents a way to take better control of your hunger and help you on your path to managing your weight and ultimately your overall well-being.\* Slim and Sassy Contrōl is a powdered mix in a convenient stick pack that you can take strategically during the course of the day to help control your appetite.\* Contrōl is also available in a snack bar, which comes in three different flavors. Contrōl contains a revolutionary ingredient extracted from spinach that has been clinically shown to significantly reduce appetite for up to six hours.\*

## CONCEPT

Our digestive system has evolved over thousands of years to deal with rough and completely unrefined diets, and it used to take the entire 23 feet of small intestine to digest and absorb fats. Most of the time, fat made it all the way to the lower small intestine.

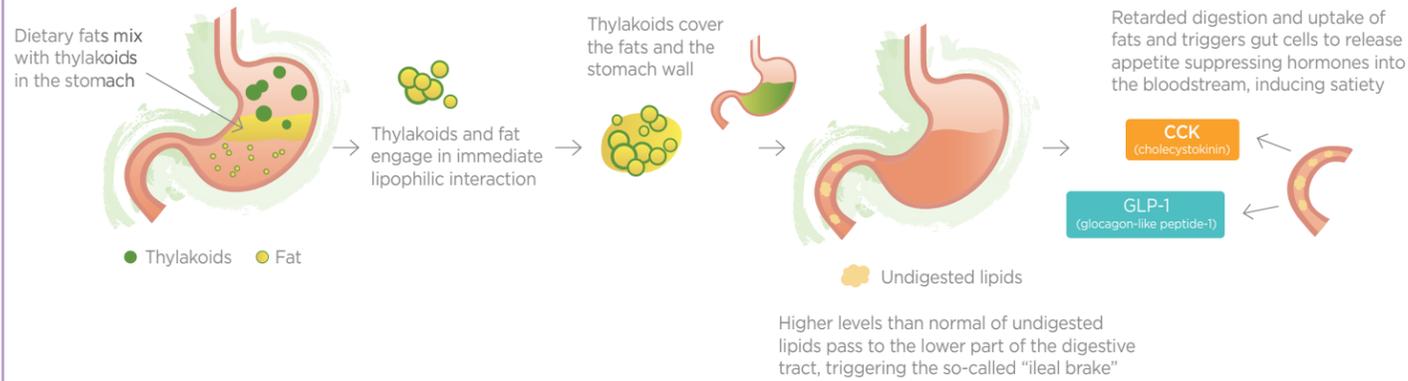

Today, however, we eat refined foods that are easier and faster to digest than ancient diets. The fats in today's diets are digested quickly in the upper intestine and then immediately absorbed, so they hardly ever make it down into the lower intestine. And because of that, the fat receptors in the lower intestine are not turned on, and they cannot tell the brain to stop eating. That's why it's so easy to overeat these days. There is nothing wrong with our digestive system; it just doesn't work as well with modern processed foods.

## CONTRŌL

Slim & Sassy Contrōl contains a new, all-natural, and clinically-tested ingredient from spinach called Appethyl.† Spinach is particularly rich in a nutrient called thylakoids. Thylakoids have clinically been shown to slow down the digestion and absorption of fats in order for the satiety mechanism in our body to do its job.\* When digestion is slowed down, a hormone in our gastrointestinal system

## Thylakoids: mechanism of action\*

Emek SC et al. *Preparative Biochemistry & Biotechnology* 2010;40:13-27  
 Montelius C et al. *British Journal of Nutrition* 2011;106:836-44

called cholecystokinin (CCK) sends a signal to the brain letting us know we're full.

Regardless of what anyone tries to tell you, there is no such thing as a magic pill and nothing will compensate for a poor diet and little or no exercise. All weight management systems must include balanced nutrition and a good exercise program to be an effective and sustainable lifestyle change. Contrōl, and the rest of the Slim and Sassy® program, gives you more tools to help you along your path.

### STICK PACKS

In order for the full satiation to take effect, 5 grams of the spinach extract is required for each serving.\* A powdered mix in a convenient stick pack was created to deliver this amount. The flavor is enjoyable and can be mixed in water, a TrimShake, or your favorite beverage. The color is green, and the formula is also very green as a whole foods dietary supplement. All natural ingredients are blended together with 124 mg of our Slim & Sassy Metabolic Blend essential oil.

### BARS

For those that like to change things up every once in a while, three flavors of bars are also available.

Five grams of Appethyl™ are also included in each bar. They are available in Apple Cinnamon, Lemon, and Apricot flavors and can be purchased in boxes of 10. They are the ultimate on-the-go satiety bar that can be eaten anytime during the day to help manage cravings and portion sizes.

### HOW TO USE

The mechanism of satiation involves slowing down the digestion and uptake of fat,\* so in order for Appethyl to work, it needs to be taken with some fat—hopefully healthy sources of fat. When taking the powdered mix, it is recommended that it be taken during meals that contain at least 5 grams of healthy fat. The bars already include the right amount of healthy fat so you can literally take them anywhere and at any time.

Appethyl has a delayed mechanism of a few hours, so it will take a bit of planning out your day to enjoy the full benefits of Contrōl. Here is the recommended method of use:

- If you tend to snack during the day, take either one bar or one stick pack in the morning with breakfast.
- If you tend to snack in the evening, take either one bar or one stick pack at lunch or in the early afternoon.

\* These statements have not been evaluated by the Food and Drug Administration. This product is not intended to diagnose, treat, cure, or prevent any disease.

## PRIMARY BENEFITS

- Promotes feelings of satiety for up to 6 hrs\*
- Significantly reduces cravings for unhealthy food\*
- Functions as a prebiotic\*
- Contains 124 mg of Slim & Sassy® Metabolic Blend (stick pack only)
- Green, both literally and from a whole foods standpoint

## FAQs

Q. How much weight can I lose with Contrōl?  
 A. Weight loss depends on dietary and exercise changes. Contrōl will support your efforts to decrease calorie intake by controlling appetite.

Q. How fast does Contrōl work?  
 A. Contrōl has its greatest efficacy 4–6 hours after its taken.

Q. Can I just eat a lot of spinach and get the same effect?  
 A. Because Contrōl is a concentrated, active extract from spinach, you would have to eat very large amounts of spinach to get the same benefit of taking one serving of Contrōl.

Q. Can I take more than one stick pack/bar a day?  
 A. Yes.

Q. Do I use these as replacements for my meals?  
 A. Contrōl is not designed as a meal replacement, though the Contrōl bars do provide a good balance of fats, carbohydrates, and protein, making a good snack.

Q. Are the stick packs/bars GMO and gluten free?  
 A. The stick pack is non-GMO and gluten free. The ingredients in the bars are free of GMO and gluten, but are manufactured in a facility that produces products containing GMO and gluten-derived ingredients.

Q. Are the stick packs/bars vegetarian friendly?  
 A. Both the stick packs and bars are vegetarian friendly. The stick pack is vegan, but the bars contain milk and may contain traces of egg.

\* These statements have not been evaluated by the Food and Drug Administration. This product is not intended to diagnose, treat, cure, or prevent any disease.

Q. I'm on anticoagulant medications. Should I be concerned about vitamin K in Contrōl?  
 A. If you are currently taking anticoagulant medications, we recommend that you consult with your health-care provider before using Contrōl. The unique spinach extract that is used in Contrōl, delivers approximately 110 to 130 mcg of naturally occurring vitamin K1 (phylloquinone) per serving. The amount of vitamin K1 in Contrōl is about 140% of the Daily Value, but is relatively low compared to what some green vegetables contain. For example, 1/2 cup of cooked kale, spinach, Swiss chard and broccoli, deliver 531 mcg, 444 mcg, 286 mcg and 110 mcg of vitamin K, respectively. Generally, experts recommend that patients on anticoagulant therapy should avoid large daily variations in vitamin K intake, while moderate but constant vitamin K intakes are preferable.

## COMPLEMENTARY PRODUCTS

- Slim & Sassy Metabolic Blend
- Slim & Sassy Softgels
- Slim & Sassy TrimShake (chocolate or vanilla)
- Lifelong Vitality Pack
