Garbage Disposal Refreshers

Instructions:
• Combine baking soda and salt into bowl.
• Add castile soap and essential oil into mixture.
• Add water one tablespoon at a time while stirring with hands until it forms into the consistency of damp sand. It should stay together when you press it together. If you add too much water, just add some more baking soda and salt until the consistency is right.
• Grab a tablespoon measurement device and scoop packed spoonfuls onto parchment paper.
• Once the mixture has been scooped, let dry for 24 hours or until they are hard. One batch should make about 36 garbage disposal refreshers.
• Once hard, put into glass jar or container, and use the next time you do dishes. Just put 1-3 refreshers into the garbage disposal and turn it on. You will immediately smell the refreshing essential oils.
