- + Encourages relaxation*
- + Supports cognitive function and emotional balance*
- + Promotes mental well-being*

Description

Adaptiv Calming Blend Capsules combine the soothing benefits of specifically selected CPTG® essential oils with clinically studied botanicals. A supportive and relaxing formula, this proprietary blend of ingredients helps empower and encourage when adapting to stressful situations or acclimating to new surroundings.* Adaptiv Calming Blend Capsules are one of the best tools available to help manage the effects of everyday tension, anxious feelings, uneasiness, and worry.*

Concept

Adaptiv Calming Blend Capsules provide the mood-supporting and tension-reducing effects of CPTG® Lavender, Coriander, Wild Orange, and Fennel essential oils, Scelletium, GABA, and Ahiflower.

Botanical extract Scelletium comes from a succulent plant found in South Africa known as Kanna. Scelletium extract is responsibly sourced from a sustainable supply with endorsement by the South African indigenous knowledge holders. A unique phytochemical ingredient found in Scelletium extract brings a feeling of "alert serenity."* The extract supports healthy emotional responses to everyday stressors and promotes feelings of happiness and well-being.* It balances mood and improves cognitive function while combating occasional nervousness.*

Based on preclinical evidence about the quieting neurotransmitter, GABA, it may help promote relaxation and have a natural comforting effect to help reduce feelings of apprehension and fear by decreasing neuronal excitability.* GABA is sometimes called "the brakes of the brain," because it lowers the activity of neural cells in the brain and central nervous system, and can have the effect of moving the brain and the body into lower gear.* By inhibiting neural activity, GABA reduces mental and physical strain.*

Adaptiv Calming Blend Capsules assist the body and mind to stay balanced and adapt to every situation.*
