This synergistic and first-of-its-kind blend naturally up-regulates the body’s protective transcription factors while activating skin-protecting proteins (inhibiting the enzymes that breakdown elasticity and collagen) with the added benefit of promoting collagen production.* Additionally, this active botanical powerhouse can be applied topically to revitalize aging skin and taken internally to support a healthy inflammatory response at the source and promotes healthy metabolic function.* With main chemical components punicic acid (an omega 5), antioxidants, β-caryophyllene, and chamazulene, this vegan-friendly active botanical duo supports cellular, immune, and nervous system function and rejuvenation when taken internally.*
